In 2025, Astra Capital will officially launch our global financial products and digital asset trading platform, providing global users with a one-stop diversified financial service platform.

01 Forex Trading

Competitive spreads, fast execution, and global currency pairs.

02 Crypto Trading

Secure access to top cryptocurrencies with advanced trading tools.

03 Digital Asset Management

Professionally managed portfolios for sustainable returns.

WHAT IS STAKE ?

Staking is when you lock crypto assets for a set period of time to help support the operation of a blockchain. In return for staking your crypto, you earn more cryptocurrency.

Many blockchains use a proof of stake consensus mechanism. Under this system, network participants who want to support the blockchain by validating new transactions and adding new blocks must “stake” set sums of cryptocurrency.

HOW DOES STAKING WORK ?

Staking is a good option for investors

If you own a cryptocurrency that uses a proof of stake blockchain, you are eligible to stake your tokens. Staking locks up your assets to participate and help maintain the security of that network's blockchain. In exchange for locking up your assets and participating in the network validation, validators receive rewards in that cryptocurrency known as staking rewards.
